

# “Fast pass” daily screening with our app

As a Duke Health team member, you can use HealthCheck to verify your health status by answering screening questions on your phone before arriving to work. The app generates a "digital pass" that you may show screeners when entering our hospitals or clinics.

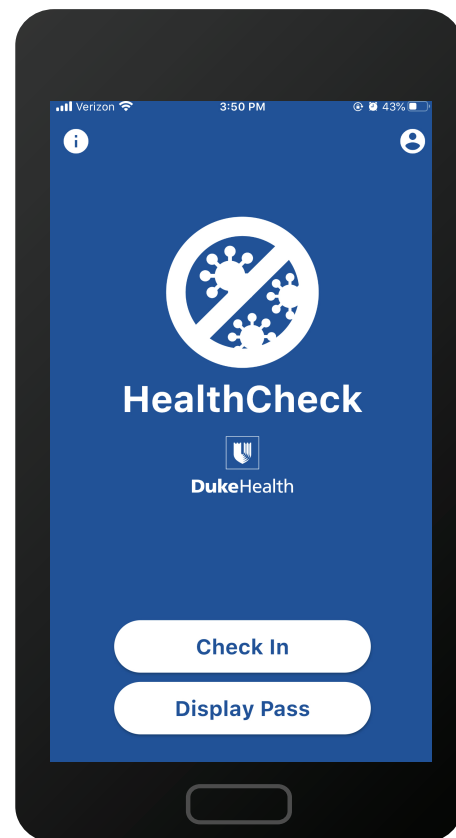

While using HealthCheck is optional, we encourage you to give it a try. It is easy to get started:

Download the “Duke HealthCheck” app, enter your full legal name and follow the steps to register using your Duke NetID.

You will need to give the app permission to authorize use on your mobile device.

Once installed, use HealthCheck before coming to work to complete the daily health screening questions. The questions in the app mirror our current in-person health screening. Based on your answers, the app will generate a pass to display at screening either clearing you to work or indicating instructions on how to proceed if you are not cleared for work.

As you enter the building and sanitize your hands and put on a mask, healthy team members will simply show screeners the app's digital pass, which is valid for 14 hours, to then receive their sticker for the day. This allows for a quicker screening process.
