

We are committed to keeping you safe.

Thank you for choosing Duke Health for your care. The safety of our patients, visitors and team members is our top priority. We want to assure you our processes follow CDC guidelines and recommendations—allowing us to provide quality care while keeping you, your family and our team safe and healthy.

We have made significant changes to our operations to keep you safe, including:

Masks are required for everyone who enters our facilities. You will be provided with a new mask every day. Patients and visitors in our hospital should wear their mask when a Duke team member enters their room and when traveling to and from procedures. Please let us know if your mask becomes damaged, so we can replace it.

Mandatory health screenings and visitor restrictions to reduce the risk of illness in our facilities.

Everyone is encouraged to perform frequent hand hygiene. We have installed additional hand sanitizing stations and signage to promote hand hygiene for all staff, patients and visitors.

We thank you in advance for your patience and understanding. Please know that we are doing everything possible to minimize the spread of infection and protect you, your loved ones and our team.
